

IMPACTS TO DATA DELIVERY TIMELINES

When determining the timeline of when data will be available to a requestor, a number of factors are considered:

Purpose of the data

- Fulfill a state or federal reporting requirement?
- Support executive or executive branch decision making?
- Support legislative decision making?
- Does it meet the needs of multiple education stakeholders?

Data Readiness/Quality

- Is the data in-house?
- Is the data linked?
- Has the data been profiled and any data issues been identified?
- Staff availability/resources?
- Data submitted in proper format?

Similarities to other requests

- Can a number of requests be met with the same work?
- Has something similar already been done that can be leveraged?
- What is the time required to complete the request?

Assist with ERDC goals

- Does the request assist ERDC with exploring data not previously used?
- Does the request assist ERDC in developing new processes and protocols for sharing data?
- Links to a critical question

Requestor

- Education partner, legislator
- Researcher, evaluator
- Requestor has a clear idea of data needed
- Requestor has earlier requests that can be bumped
